

SW & SOLUTIONS

TESTING

We support clients in the application testing phase and have solid experience in the ICT sector and by implementing the main supporting technologies.

OVERVIEW

Thanks to the **expertise gained in contexts of great industrial importance** we are able to assist customers in all of testing phases, from planning to execution, **from tuning to bug fixing**, working closely with the **Development and Exercise facilities**.

KEY BENEFITS

The experience and expertise given, allow our customers to structure, even from scratch, a **factory testing of all sizes**, both in service mode **c/o customer site or remote c/o our offices**.

DATA ANONYMIZATION

In an environment characterized by strong evolutions the Data Privacy is a pillar of credibility of the added-value service providers. ICT is structured in various ways, including **Data Masking** in which Soft Strategy has deep knowledge.

OVERVIEW

The ICT **data anonymization** is the most common solution to make anonymous the **sensitive data** contained in typical **DB** in developing and testing environments, and allow their use in line with the provisions of regulation.

Our **technological expertise** and regulations allow to respond to this need in a dynamic and flexible way.

KEY BENEFITS

Through this service our **customers will continue to use data in development and testing environment**, as for legal regulation.

The solution we offer is **strong and flexible** to adapt to different technological and dimensional context.

SOFTWARE DEVELOPMENT

We are specialized in the design and building multi-platform end-to-end applications, and 'Mobile' development for iOS and Android.

OVERVIEW

We develop end-to-end multi-device applications on different technological platforms, in particular **Microsoft .NET Framework** and **SAP**.

We have a strong know-how on responsive graphics concept design, solid knowledge in **HTML5** and **JavaScript and main Open Source CMS**, promoting the use of the practice '**Agile programming**'.

KEY BENEFITS

We offer our customers a **wide range of integrated capabilities** into a single centre of excellence, capable of managing software development projects with medium to high complexity.

We have strong experience in the development of technology platforms **"traditional" best of breed and the main innovative stack** for web development multiplatform.

ESRI GIS

We design and build enterprise architectures on ESRI GIS platform, to manage geodatabase and their related operations.

OVERVIEW

Our group is specialized in **ESRI technology** and provide skills on design and development of **GIS applications in Web, Mobile, Server and Desktop** environments.

We create geodatabase, backend architecture for publishing map services, server configurations and all the related **system integration activities**.

KEY BENEFITS

We provide a valuable contribution in different vertical markets, analysing at best necessary information to understand **data, patterns and trends** relevant for all customers who use analysis and sharing data tools on maps and geodatabases.
